Qualitative Disclosure on LCR

As per Reserve Bank of India guidelines, all deposit-taking NBFCs irrespective of their asset size and non-deposit-taking NBFCs with an asset size of Rs.5,000.00 crore and above are required to maintain a liquidity coverage ratio (LCR) to ensure availability of adequate high-quality liquid assets (HQLA) to survive any acute liquidity stress scenario i.e, cash outflow increased to 115% and cash inflow decreased to 75%, lasting for 30 days. As per RBI guidelines, LCR has been calculated using the simple average of daily observations (over a period of 90 days).

Cash outflows under secured funding include contractual payments of the term loan, NCDs, and other debt obligations including interest payments. To compute inflow from fully performing exposures, the company considers collection from performing advances including interest due in the next 30 days. Other cash inflows include cash from unencumbered fixed deposits, Certificates of deposits, and mutual fund investments maturing in the next 30 days. The LCR as of June 30, 2023, is 102.95%, which is above the regulatory requirement of 60%.

Note: In order to maintain adequate liquidity while earning a risk free return, an overdraft limit of Rs.30,401.49 lakhs against fixed deposits have been availed. Average withdrawals in overdraft account has been Rs.2224.83 lakhs during the quarter ended 30 June 2023. This is considered a source of liquidity for the company. Hence, the adjusted LCR (incorporating an unavailed overdraft limit) are furnished below:
