Qualitative Disclosure on LCR

As per Reserve Bank of India guidelines, all deposit-taking NBFCs irrespective of their asset size and non-deposit-taking NBFCs with an asset size of Rs.5,000 crore and above are required to maintain a liquidity coverage ratio (LCR) to ensure availability of adequate high-quality liquid assets (HQLA) to survive any acute liquidity stress scenario i.e, cash outflow increased to 115% and cash inflow decreased to 75%, lasting for 30 days. As per RBI guidelines, LCR has been calculated using the simple average of daily observations over the previous quarter (over a period of 90 days).

Cash outflows under secured and unsecured wholesale funding include contractual payments of the term loan, NCDs, and other debt obligations including interest payments due in next 30 days. Other contractual funding obligations include contractual payments due in next 30 days.

To compute inflow from fully performing exposures, the company considers collection from performing advances including interest due in the next 30 days. Other cash inflows include cash from unencumbered fixed deposits, Certificates of deposits, undrawn lines of credit, and mutual fund investments maturing in the next 30 days. The LCR as of June 30, 2025 is 127.24%, which is well above the regulatory requirement of 100%.

1 Unweighted values have been calculated as outstanding balances maturing or callable within 30 days (for inflows and outflows).

2 Weighted values have been calculated after the application of respective haircuts (for HQLA) and stress factors on inflow and outflow

* LCR has been calculated using simple average of daily observations of data points
