

SCNL follows a risk-based lending rate system, where the interest rates offered to our customers are determined based on the customer's vintage in our system. For new customers, the applicable rate of interest is fixed at **27.95%**. For cycle 2 customers, a benefit of **3.12%** is given and the customer is entitled to avail loan at **24.83%**. From cycle 3 onwards, there will be a reduction of **0.15%** from the interest rate of the previously disbursed main loan.

The below mentioned product structure is effective from **2nd February 2026**. In the below-mentioned tables, **Equated Periodic Instalment** is tentative; the actual instalment may vary depending on the applicable rate of interest, moratorium period & dynamic repayment schedule. To avoid issues with cash handling during center meetings, the installment charged to customers is always rounded up to the nearest multiple of 10. Any excess amount collected due to this rounding is adjusted and settled in the final installment. The actual EPI along with detailed repayment schedule is shared with customer before executing the loan agreement.
