Qualitative Disclosure on LCR

As per Reserve Bank of India guidelines, all non-deposit-taking NBFCs with an asset size of Rs.5,000 crore and above are required to maintain a minimum LCR of 100% and have sufficient unencumbered High-quality liquid assets (HQLA) which can be easily convertible into cash to survive any acute liquidity stress scenario lasting for 30 days. Under Stress scenario, Inflows are reduced by 25% and outflows are increased by 15%. LCR has been calculated using the simple average of daily observations over the previous quarter in line with RBI guidelines.

Cash outflows under secured and unsecured wholesale funding include contractual payments of the term loan, NCDs, and other debt obligations including interest payments due in next 30 days. Other contractual funding obligations include contractual payments. To compute inflow from fully performing exposures, the company considers collection from performing advances including interest due in the next 30 days. Other cash inflows include proceeds from fixed deposits, undrawn lines of credit and mutual fund investments. The LCR as of June 30, 2026 is 134.89%, which is well above the regulatory requirement of 100%.

1 Unweighted values have been calculated as outstanding balances maturing or callable within 30 days (for inflows and outflows).

2 Weighted values have been calculated after the application of respective haircuts (for HQLA) and stress factors on inflow and outflow

* LCR has been calculated using simple average of daily observations of data points
